BASHIR MUHAMMAD IDRIS

muhammadbashir754491830@gmail.com +2348102952393

KEY SKILLS

Frontend Development: Proficient in HTML, CSS, and Vanilla JavaScript for building responsive and accessible web interfaces.

React.js: Skilled in developing single-page applications using React, with strong understanding of components, state management, and React Hooks.

Styling Frameworks: Experienced in using Tailwind CSS for efficient and modern UI design.

API Integration: Capable of making RESTful API calls, handling asynchronous data using fetch and async/await, and integrating backend services into frontend applications.

EDUCATION

B.Ed. Educational Administration and Planning

Graduate with Second-class upper degree.

SOFT-SKILL

I am a Frontend Engineer with a strong flair for software development, proficient in building user-centric applications using React. I am passionate about developing fast, efficient, and scalable frontends, with a focus on transforming designs into functional, production-ready features.

I hold a B.Ed. in Educational Administration and Planning, graduating with a Second-Class Upper degree — a background that reflects my strong analytical thinking, adaptability, and

commitment to excellence. This diverse foundation made it easy for me to grasp and understand the fundamentals of programming, and it reinforces my versatility and readiness to adapt to new technologies, developments, and work environments.

I take pride in writing clean, maintainable code and consistently adhere to best practices. I am inquisitive, open-minded, and self-driven, with a continuous desire to learn, grow, and contribute effectively to any team or project setting.
